

The diagram shows a four-bar linkage mechanism within a circular frame. It consists of four links: a fixed frame (ground), a crank, a coupler, and a rocker. The joints are labeled as follows:

- Revolute Joint (Pin Joint):** Indicated by a small circle with a dot at the pivot points between the frame and the crank, and between the coupler and the rocker.
- Revolute Joint (Pin Joint):** Indicated by a small circle with a dot at the pivot point between the coupler and the frame.
- Revolute Joint (Pin Joint):** Indicated by a small circle with a dot at the pivot point between the rocker and the frame.
- Revolute Joint (Pin Joint):** Indicated by a small circle with a dot at the pivot point between the rocker and the coupler.

Labels with leader lines point to these joints and the links themselves.

A crossword puzzle grid with numbers 1 through 25. The grid is L-shaped, with numbers 1-15 in the horizontal section and 16-25 in the vertical section. Some cells are shaded blue.
